CSE490 (D)

INTRODUCTION TO FOOTBALL DATA AND ANALYTICS

IN ASSOCIATION WITH BANGLADESH FOOTBALL FEDERATION

SPRING 2026

- Professional Certificate from BFF
- Internship Opportunity at **BFF Data Science** Department after successful completion
- Learning from the **industry experts** of Football Data Science
- Opportunity to **co-author** research papers for **Sports Data Conferences**

CSE490 (D)

Introduction to

Football Data & Analytics

Lecture-5

Prepared by-
Tarvir Anjum Aditto
Lecturer,
CSE, Brac University

Scouting

- Money saving discovery
- Create player profile
- Can find similar profile cheap option
- Every action on the pitch says something about the player's skill.

Scouting

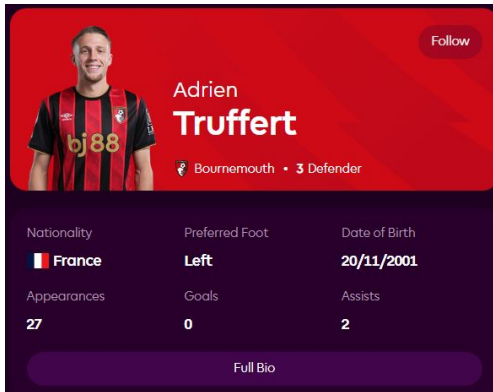

What should be measured as successful?

- Interception & pressure can be important metrics.
- Tackling is the last option.

Single player data doesn't portray the context properly.
We can compare with one other player, or all player at once.

Player Profile

Again, which metrics should we use?

05.04.2020 - 13:20 | source: Transfermarkt | Reading Time: 3 mins

Analysis of top 5 leagues

Pass completion rates: PSG dominate top 20 - Otamendi best in Premier League with 92.4%

The image shows a player profile card for a football player. It includes a small portrait of the player on the left. The header bar contains the date and time '05.04.2020 - 13:20', the source 'source: Transfermarkt', and the reading time 'Reading Time: 3 mins'. Below the header, there is a sub-header 'Analysis of top 5 leagues' in blue. The main title of the article is 'Pass completion rates: PSG dominate top 20 - Otamendi best in Premier League with 92.4%'. To the right of the title, there are social media sharing icons for email, a generic share icon, and Facebook.

Will pass completion rate says all about a player's passing skill?
What attributes should we focus on?

Metrics

Some metrics we can use for strikers

Shot Touch:

The amount of shots a player takes as a proportion of their touches of the ball.

Pressure Regains:

Times a player's team won the ball back within 5 seconds of the player pressuring an opponent, per 90 minutes.

Turnovers:

How often a player loses the ball via a miscontrol or a failed dribble per 90 minutes.

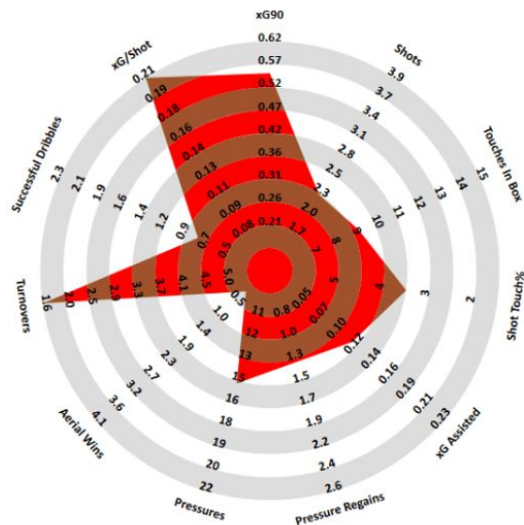

Metrics

Pierre-Emerick Aubameyang

Arsenal, 2017/2018
